			structure for the period 2000 – 2005 would also be made based on the 2006 National Accounts compilation, and other required data.			
Balance of Payments	During 2010, Balance of Payments Statistics for 2006 will be released, along with the National Accounts and Tourism Satellite Accounts for 2006.	During 2010, Balance of Payments Statistics for 2006 will be released, along with the National Accounts and Tourism Satellite Accounts for 2006.	The data compiled for the period 1995 – 1999 is incomplete due to many gaps in required information.	Data from financial institutions, money transfer companies, and government is required to compliment the compilation. Data on non-resident transactions from these agencies is not available or difficult to obtain. Although, these challenges still exist, it is anticipated that the Establishment Survey would be able to capture some of this information, and enable a more reliable dataset for Balance of Payments. Further work in enhancing the reliability of data from the agencies	Additional training on the new BOP manual.	Microsoft Excel

				<p>mentioned is on-going. The current banking questionnaire is being revised for a launch in the first quarter 2010. This questionnaire will attempt to capture the data required for the Balance of Payments from the banks. Also, a form to collect data monthly from the money transfer agencies will be developed for implementation in 2010 (it is envisaged that this will be done in collaboration with the Financial Services Commission).</p>		
<p>Selected Short Term Economic Indicators (e.g. CPI, Domestic Production Index etc.)</p>	<p>Consumer Price Index and Tourism Price Index</p>	<p>Monthly CPI information and quarterly TPI information . Monthly CPI report disseminated along with regular press releases on inflation.</p>		<p>CPI base is out-dated. The last Household Expenditure Survey was conducted in 1995. TPI outdated – base year 1999.</p>	<p>A consultant recruited though the Commonwealth Secretariat is currently conducting a Household Expenditure Survey. This will be completed by April 2010. The re-basing of the CPI will be concluded by the third quarter 2010.</p> <p>Technical assistance or training to construct a Construction Cost Index.</p> <p>Ongoing training on price collection techniques and price</p>	<p>Microsoft Excel – for compilation of current CPI and TPI.</p> <p>CSPro – data capture for Household Expenditure Survey.</p>

					index calculation. Training in the utilization of PIPS software.	
Economic Activity/Labour Force Statistics	<p>1998 – 2008 Employment Statistics. However, 1990 – 1997 data is presently being compiled in SPSS from an old compilation system.</p> <p>Employed by sex, age group, island, occupation, industry, and nationality. Average earnings by sex, age, industry, occupation, and nationality.</p>	A framework based on the employment data collected from Social Security.		<p>Employment data is currently collected from the Social Security Board on an annual basis. However, many inconsistencies exist for insane data on the number of employees by sector and occupational group is inaccurate.</p> <p>A presentation was made to the Social Security Board in which the inaccuracies in the data were highlighted, along with recommendations to amend the data. Some in-house revisions have been completed to correct some of the inaccuracies in the employment databases.</p>	A Labour Force Survey should be performed every five (5) years. One has never been attempted by DPU. With the formation of a Survey Unit in the department from 2010, the Unit will undertake to commence plans to conduct its first Labor Force Survey in 2012.	SPSS
Banking Statistics	Information on the banking industry including assets, liabilities, deposits, loans by sector and interest rates	The template for an Annual Banking report is being developed.	Gaps in data as a result of banks not comprehensively completing the questionnaire.	Data lags as a result of late return of questionnaire by banking institutions. Offshore banks are not included in the survey.	Two additional persons are currently receiving in the compilation of Monetary and financial statistics. A new banking questionnaire will be launched in the first quarter 2010. It will incorporate elements from the current questionnaire, the prudential	Microsoft Excel – banking questionnaire template.
