DEVELOPMENT OUTCOMES”***

CARICOM

# Launch of the Regional Census e-Portal

# BACKGROUND

The development of the Census e-Portal was an activity under a sub-project of the CARICOM Capacity Development Programme (CCDP) aimed at analyzing data for the 2000 Round of Population and Housing Censuses in the Caribbean.

The CCDP was funded by the Canadian International Development Agency (CIDA).

The establishment of an appropriate Data Processing System to Support the Analysis of the Census Data was an activity of this CIDA Project. Hence the Regional Census e-Portal.

# What is this Regional Census e-Portal?

The CARICOM Regional Census e-Portal is an online data warehouse designed to facilitate reporting and analysis of census data.

One of the primary objectives of the portal, is to make available to users a facility that will promote the notion of self service. The site allows users to access a list of standard pre-determined tables or alternatively build their own custom tables using drag and drop functionality within their web browser.

# Features of the Application

Some of the features include:

- Membership Management - Allows users to pre-register and maintain user account on system;
- Pre-Defined Reports - Provides the ability to present a number of pre-determined tables and charts to users;
- Ad Hoc Reporting - Allows users to create their own custom reports using drag and drop functionality;

# Features of the Application

- Data Export - Allows the export of data from tables generated to Microsoft Excel;
- Filtering - Allows users to limit tables to only the data that the user needs

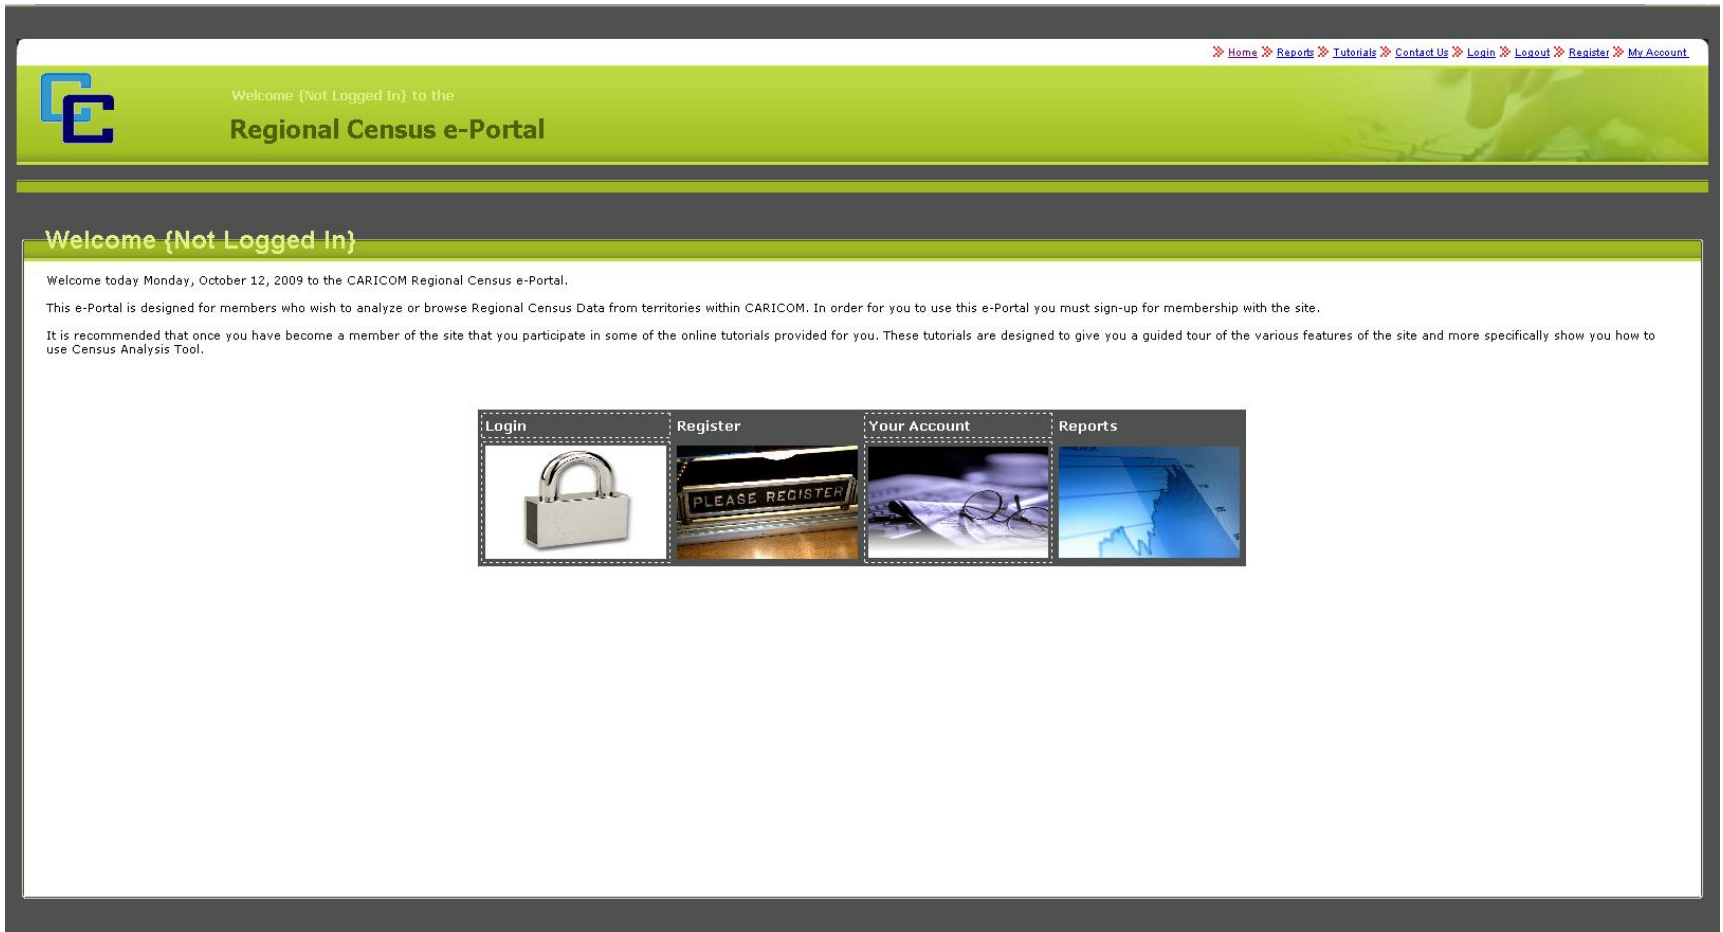

# Next Steps

- To Populate the Census Online Database for the other Member States with data from the 2000 Round of Censuses.
- Technical Assistance is requires to assist with this activity.
